Job description:

International Mobility Company established in France is searching for 15 talented and skilled Java Developer with experience in building high-performing, scalable, enterprise-grade applications. You will be responsible for Java/JEE application development while providing expertise in the full software development lifecycle, from concept and design to testing.

Key responsibilities:

- Design and develop high-volume, low-latency applications for mission-critical systems, delivering high-availability and performance.
- Contribute in all phases of the development lifecycle.
- Write well designed, testable, efficient code.
- Ensure designs are in compliance with specifications.
- Prepare and produce releases of software components.
- Support continuous improvement by investigating alternatives and technologies and presenting these for architectural review.

Requirements:

- ✓ **General requirements:**
 - EU28 + Norway or Iceland citizenships
 - Residence in a EU28 country + Norway or Iceland (outside France)
 - Between 18 and 35 years old
 - Registered on EUJOB4EU Platform with a complete CV in English
- ✓ **Language knowledge:**
 - Good command of both French and English is mandatory.

✓ **Other specific requirements:**

- Master's degree in Computer Science, Engineering or a related subject
- At least 3 years of Java programming experience
- Proven hands-on Software Development experience
- Proven working experience in Java development
- Hands on experience in designing and developing applications using JEE platforms
- Object oriented analysis and design using common design patterns.
- Profound insight of Java and JEE internals (Class loading, Memory Management, Transaction management etc)
- Excellent knowledge of Relational Databases, SQL, Frameworks (Spring, Struts, Hibernate)
- Experience with test-driven development
